

Hydrant Flushing Notice

Last updated: May 12, 2025

Starting this week, our crews will be out doing **hydrant flushing and pressure testing** around **Big White Ski Resort**. This is part of our regular system maintenance to ensure everything's working properly and water stays safe.

You might notice:

- **Discolored water**
- **Lower water pressure**

If that happens, just run your **cold water tap** for a few minutes. Thanks for your patience while we keep your water system running strong!

We continuously monitor water quality to ensure it meets the highest safety standards. If you have any questions or concerns, please contact us.
